

Vhi, Vlo and CS- are isolated from all other power supply terminals. Any one of these can be connected to any other power supply terminal.

Hi/Lo Supply Switch

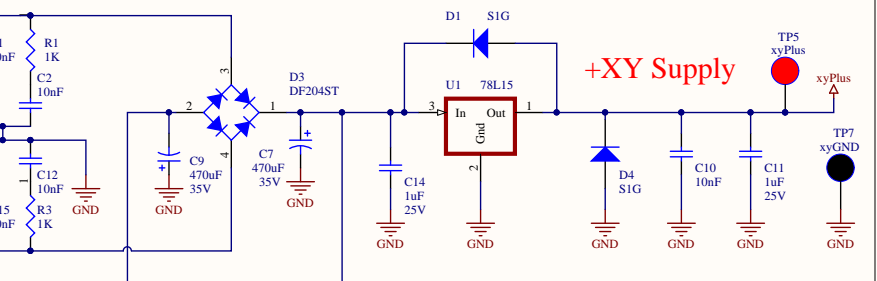

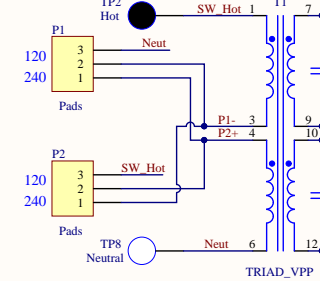

Collector Supply Switch

Front Panel

Step Generator Isolated Supply

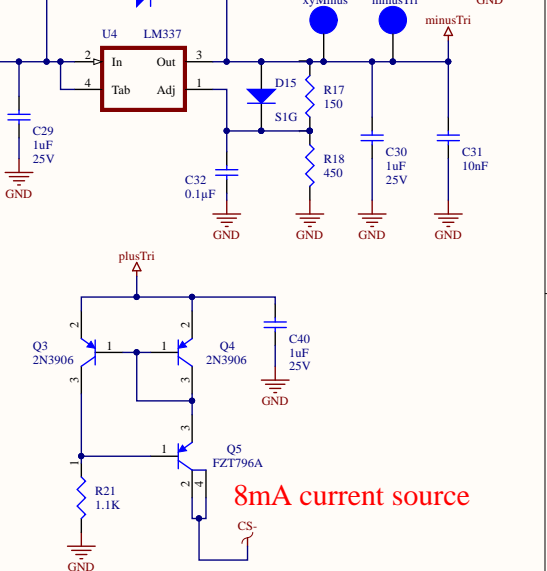

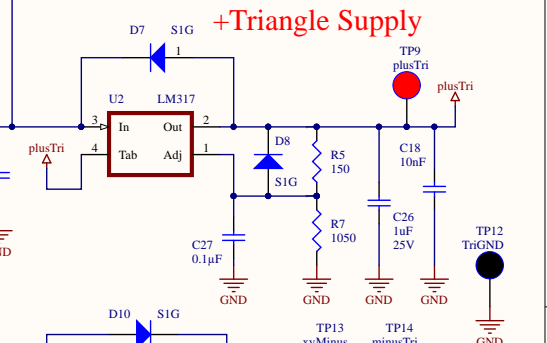

+Triangle Supply

-Triangle and -XY Supply

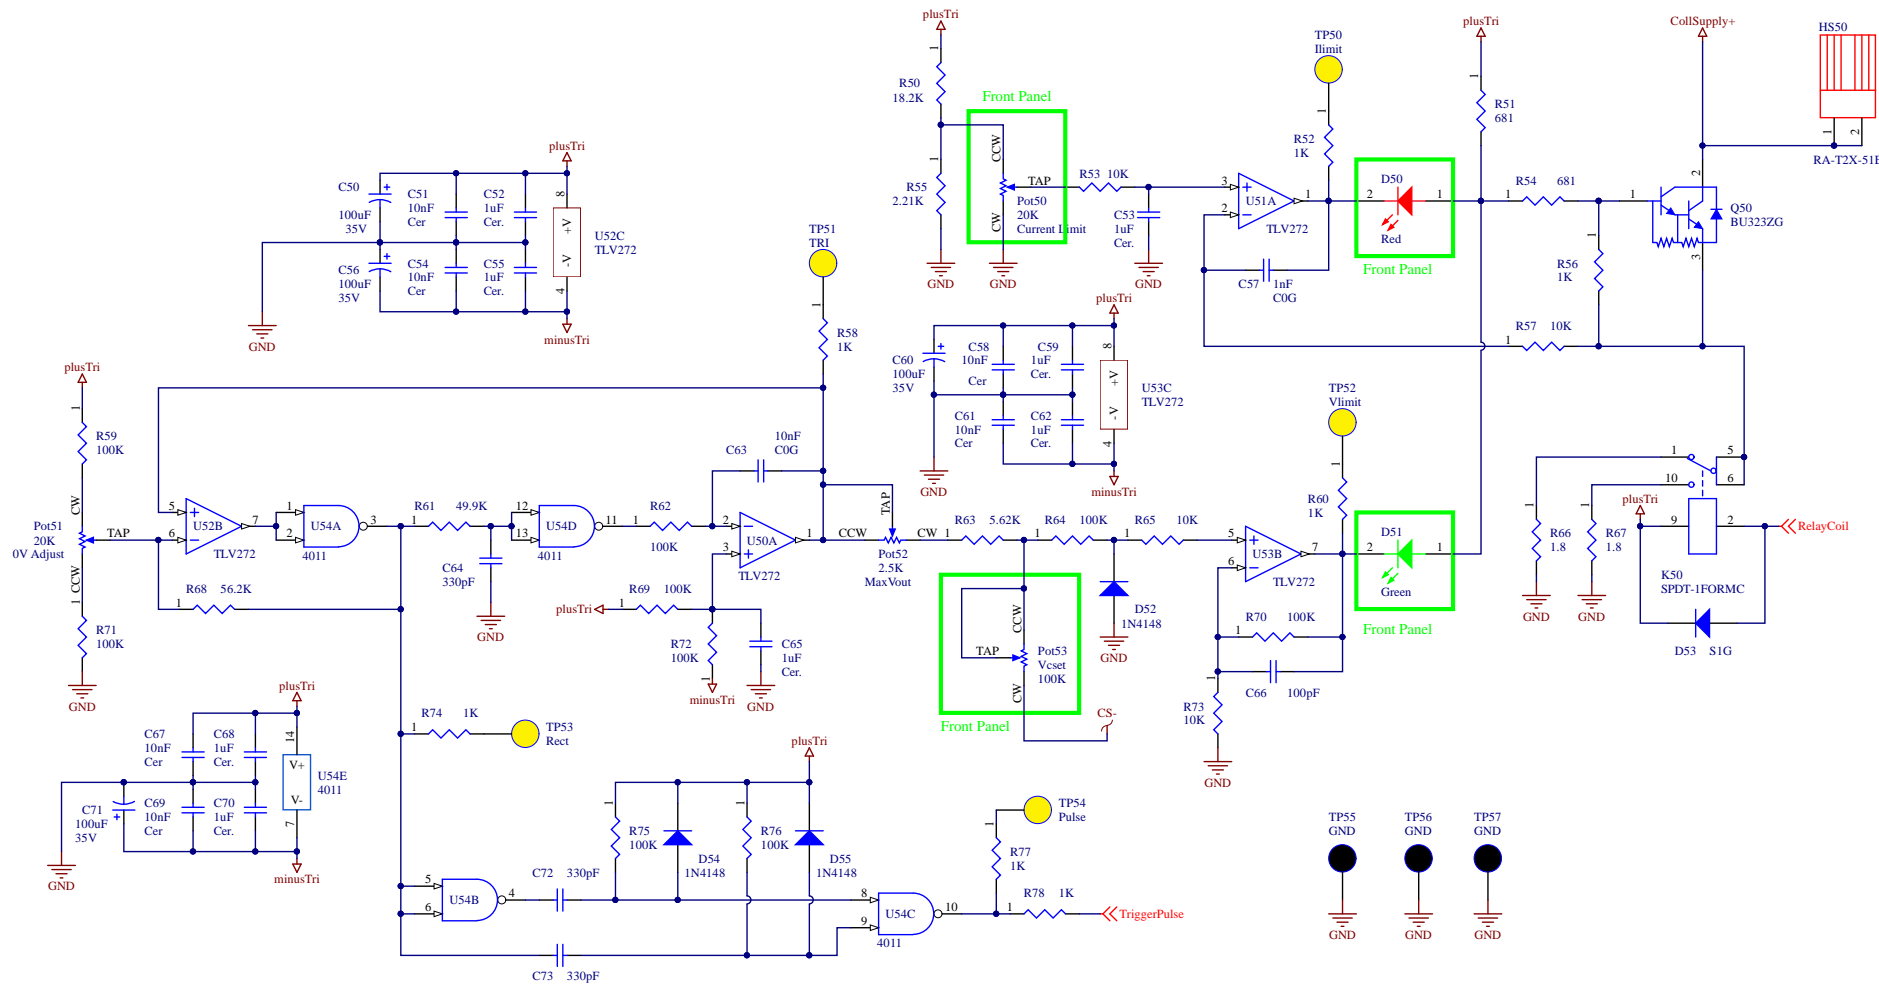

The step supply is completely isolated from all other power supply terminals.

The ISO nomenclature is used on the reference terminal to indicate that the supply reference is isolated from the other circuit ground.

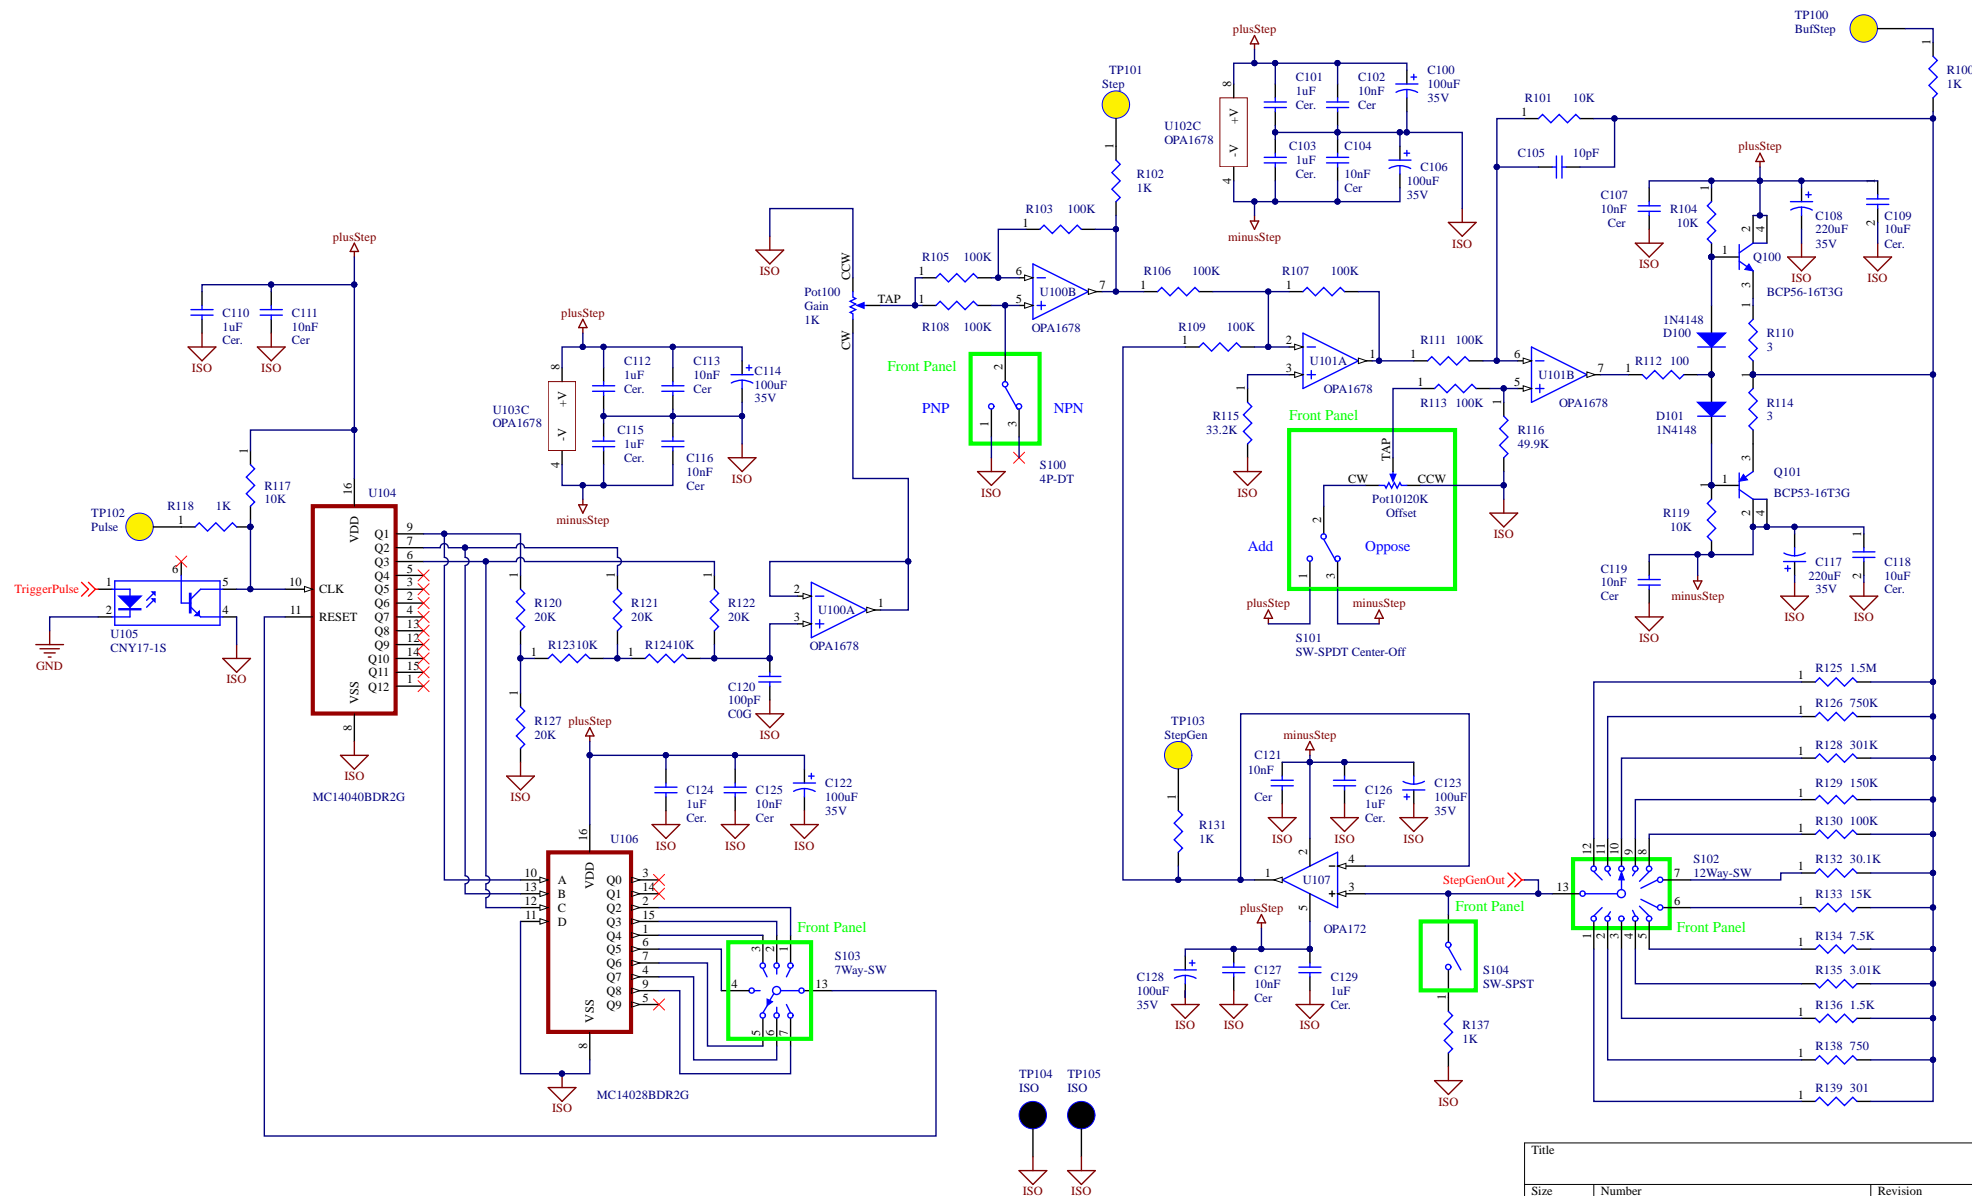

Any Step power terminal can be connected to any other power terminal like TriGND, CS- or plusTri in the design.

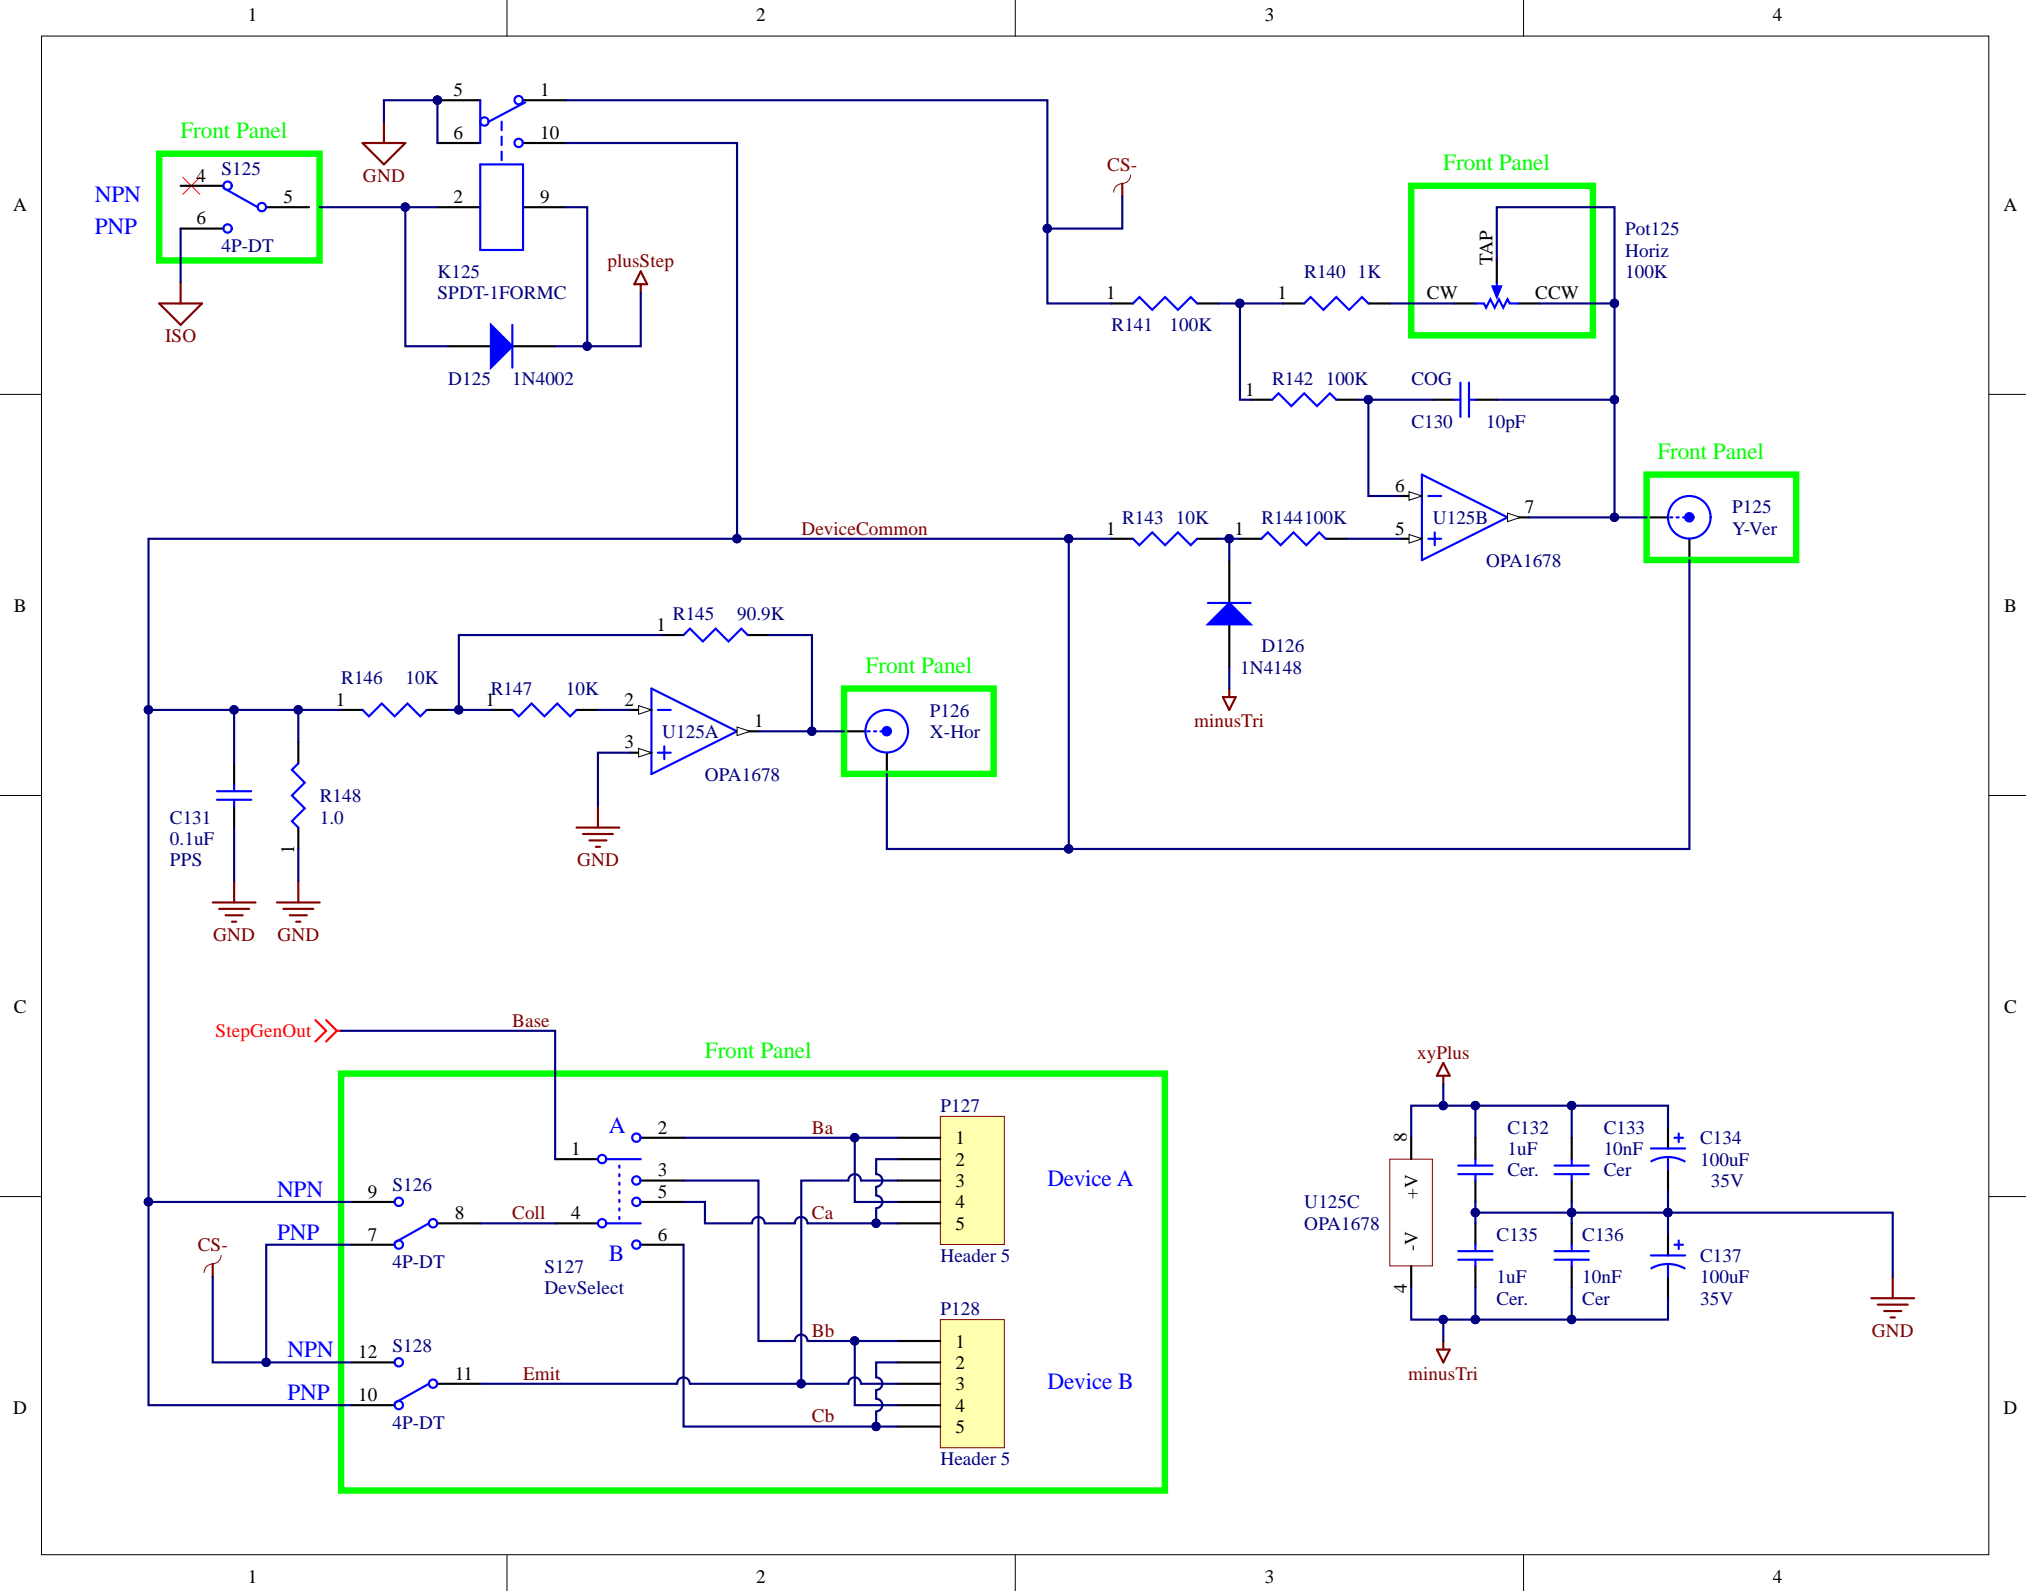

8mA current source
